Oval Saxon with Chrome Mirror

Simpsons Mirrors & Furniture is delighted to announce the launch of the new Belmont Collection designed by Peter Phan.

The Belmont Collection brings together one of the UK's leading furniture and mirror manufacturers with one of the UK's foremost interior designers.

Featuring the versatility of modern printed leathers, the opulence of bevelled mirror tiles and crystal jewelled handles, pieces in the Belmont Collection are reminiscent of the glamour of the 1920's and 1930's but are ideally suited to modern interiors – whether classic or contemporary in style.

Simpsons Mirrors & Furniture are also thrilled to be launching the new Linea Range.

The inspiration for the Linea Range comes from the fluidity and softness of the Oval shape which is being used more and more as an alternative to the traditional (square, rectangular or round shapes) within modern contemporary design projects at present.

New to this range is the use of a rich deep contemporary charcoal grey oak finish which will become an additional timber finish to the vast range of timber finishes that Simpsons already offer.

Although the Linea range incorporates a series of oval forms they are constructed using rigid rectangular bevelled mirror strips laid side by side around the oval form which together create a fabulous modern reflective surface.
